LABEXAN: a new player in R&D for health products

Philippe Chenevier was Director for the Technical Research & Product Development and the Regulatory Affairs and Safety Evaluation sectors of the Pierre Fabre Dermo-Cosmetic Laboratories between 2003 and 2009. He then founded **LABEXAN** in order to use his 15 years of experience in product development in the service of the health industry. Philippe Chenevier is a Doctor of Pharmacy. He worked as hospital intern as part of his studies, and holds a Masters Degree in Pharmacology (MSBM) and a Diploma in Pharmacotechnology and Biopharmacy.

LABEXAN acts as a real partner in the area of Research & Development of Health Products.

LABEXAN is situated in Cognac, 1h30 north of Bordeaux. It has a microbiology laboratory and an analytical chemistry laboratory run by **Jean-Baptiste GORDIEN**, who is a Doctor of Pharmacy and holds a Diploma in Industrial and Biomedical Pharmacy.

LABEXAN proposes various services: microbiological and physicochemical analyses, and support in the management of development projects for cosmetics or food supplements. It also carries out missions offering advice and expertise.
